

GT New Horizons

Garden

Gardens are non-solid, single blocks placed during world generation in appropriate Biomes. There are thirteen types of garden added by Pam's Harvestcraft. Gardens are the single largest source of early game food. Eight of each garden are required to complete the Healing Axe quest.

Acquiring

Besides world generation, gardens can also be obtained from the associated lootbag, which can be bought for five Farmer coins in the Quest Book. Nether Gardens are only available from the Nether or lootbag. Water Gardens can spawn in very large bodies of water, but are rare and can also be crafted from a Topical, Leafy, Herb and Ground garden. No gardens spawn in biomes with only snow or rock ground cover. Access to the sky is *not* a requirement for garden spawns, and they can be found underground in appropriate biomes.

Top- Grass, Berry, Mushroom, Ground, Gourd
Middle- Stalk, Tropical, Herb, Leafy, Textile
Bottom- Nether, Desert, and Water Gardens

- Mushroom, Leafy, Herb and Stalk gardens spawn in FOREST tagged biomes
- Desert gardens only spawn in SANDY tagged biomes on sand
- Berry, Gourd, Ground and Grass gardens can spawn in FOREST and PLAINS tagged biomes
- Tropical gardens spawn in JUNGLE tagged biomes
- Nether gardens spawn in any NETHER tagged biome, on netherrack
- Textile gardens spawn in FOREST or JUNGLE tagged biomes
- Water gardens spawn in SWAMP or RIVER tagged biomes, on large bodies of water
 - Lush Swamp and rwg_riverCold are good options

Usage

Left-clicking or otherwise breaking a garden will spawn three food items associated with that type. Water or breaking the supporting block will destroy gardens. Almost all of these items can be crafted into seeds to grow the associated plant. Right-clicking picks up the garden instead, so it can be moved elsewhere. Both Gardens and their plant drops can be automatically gathered with a Forester's Backpack.

Spread

[More information](#)

OK

If placed on suitable blocks with clear area nearby, gardens will spread like vanilla mushrooms, albeit at a very slow rate. Most can exist on dirt, grass, farmland (inc. modded variants), or podzol blocks. Desert Gardens can be placed on sand, or modded farmland such as Garden Soil or Fertilized Dirt (non-tilled). Water Gardens can only be placed on water or Garden Soil. Nether Gardens can be grown on Netherrack in addition to normal soil types. Gardens cannot be placed in IC2 Crop(sticks) nor accelerated with bone meal. They can be tick accelerated, such as with the Lamp of Growth, but do not work with the OpenBlocks Sprinkler.

Gardens will only spread to empty nearby blocks in a seven block diameter (radius 3, +/- 1Y level), and only if there are five or less gardens of their type in that space, up to one block above and below where they are. This can cause cascading chains of gardens on steep slopes.

Steep slopes cause cascading garden spread.

Garden Type	Possible Drops
Berry Garden	Blackberry, Blueberry, Candleberry, Grape, Strawberry, Raspberry
Desert Garden	Cactus (vanilla), Cactus Fruit
Grass Garden	Asparagus, Bamboo Shoot, Barley, Corn, Oats, Rye
Gourd Garden	Cantaloupe, Cucumber, Pumpkin (vanilla), Winter Squash, Zucchini
Ground Garden	Beet, Carrot (vanilla), Onion, Parsnip, Peanut, Potato (vanilla), Radish, Rhubarb, Rutabaga, Sweet Potato, Turnip
Herb Garden	Celery, Coffee Beans, Edible Root, Garlic, Ginger, Mustard Seeds, Spice Leaf, Tea Leaf
Leafy Garden	Artichoke, Broccoli, Brussel Sprout, Cabbage, Cauliflower, Leek, Lettuce, Scallion, Spinach
Mushroom Garden	Mushroom (brown, vanilla), Mushroom (red, vanilla), White Mushroom
Nether Garden	Blood Leaf, Flesh Root, Marrow Berry
Stalk Garden	Beans, Bell Pepper, Chili Pepper, Eggplant, Okra, Peas, Soybean, Tomato
Textile Garden	Cotton
Tropical Garden	Curry Leaf, Kiwi, Melon (vanilla), Pineapple, Sesame Seeds
Water Garden	Cranberry, Green Heart Fish, Raw Clam, Raw Crayfish, Raw Frog, Raw Scallop, Raw Shrimp, Raw Snail, Raw Turtle, Rice, Seaweed, Water Chestnut

Drops are from Pam's Harvestcraft unless otherwise noted.
