

Large Sifter

The Large Sifter is an HV-tier multiblock. It is 400% faster than singleblock machines, uses 75% of the EU/t normally required, and gains 4 parallels per voltage tier.

Construction

A Large Sifter is a solid 5x3x5 structure. The inner top two layers are Large Sieve Grates and the sides and bottom are Industrial Sieve Casings.

- 1 Controller block; front centered, bottom layer
- 1 Maintenance Hatch; any Industrial Sieve Casing
- 1 Muffler Hatch; any Industrial Sieve Casing
- 1+ Energy Hatch; any Industrial Sieve Casing
- 1+ Input Bus; any Industrial Sieve Casing
- 1+ Output Bus; any Industrial Sieve Casing
- 1+ Input Hatch, optional; any Industrial Sieve Casing
- 1+ Output Hatch, optional; any Industrial Sieve Casing
- 35-51 Industrial Sieve Casings.

Tips

- All the sieve grates and most of the sieve casings can be shared by placing a second controller upside down 3 blocks above the first.
