GT New Horizons

Density^2
	Density^2

Introduction

Density^2 is an upgraded version of the multiblock Implosion Compressor. It produces half the pollution, operates twice as faster, and supports parallel recipe processing. This multiblock is IV but requires ZPM circuit to make.

Construction

- 1 Density^2 (controller), middle layer, centered
- 10+ Robust Tungstensteel Machine Casing
- 1 Maintenance Hatch, anywhere
- 1 Muffler Hatch, anywhere, facing outwards
- 1+ Input Bus, anywhere
- 1+ Output Bus, anywhere
- 1+ Energy Hatch, anywhere

Usage

Mod	GT++
Type	Tile Entity
Relevant Quest	Cool Guys Don't Look at Explosions
Tier	ZPM
Size	3x3x3 (hollow)
Pollution	5,000 gibbl/s
Rotatable	Yes
